

# JP SERIES : SPLIT CORE CURRENT TRANSFORMER

## Technical Parameter

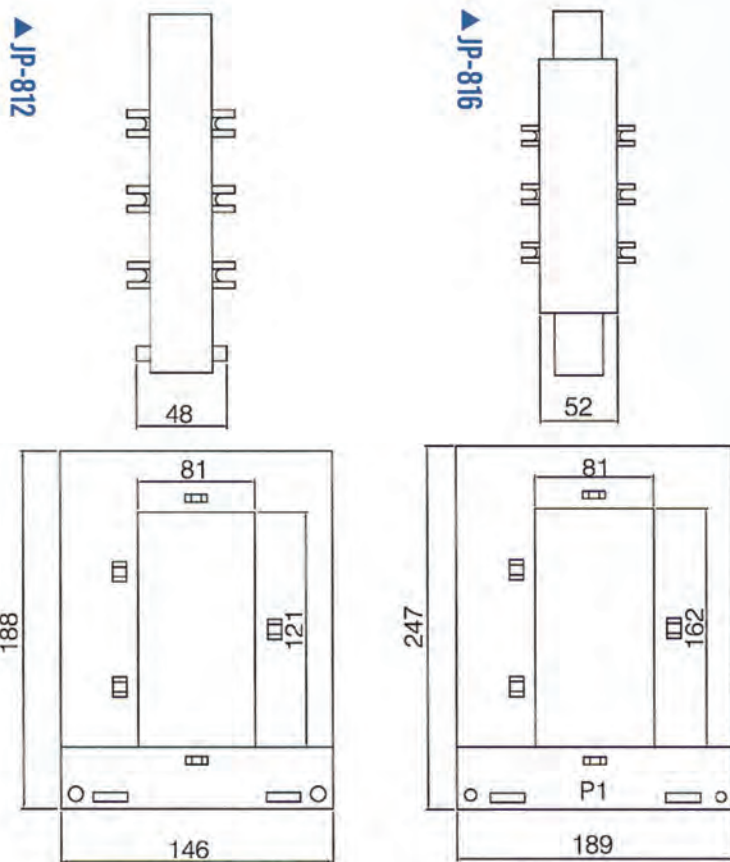

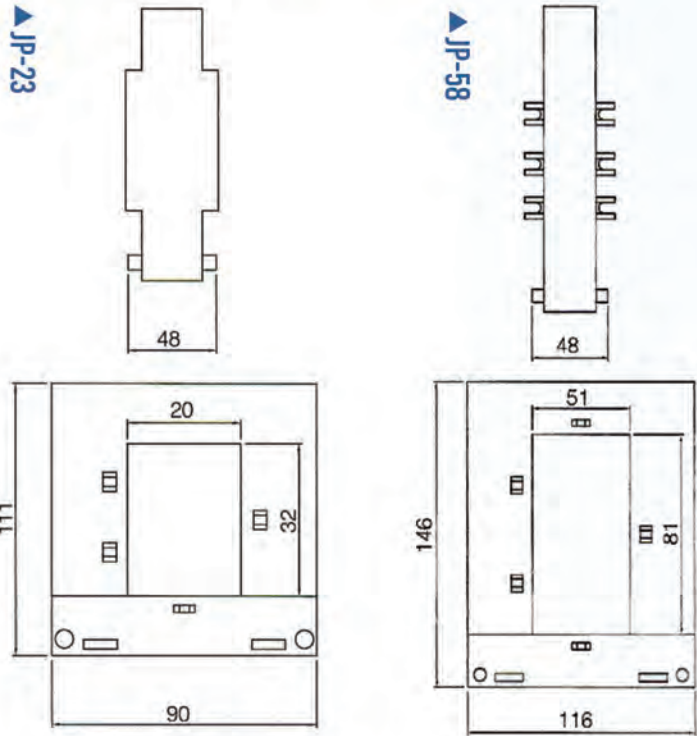

Primary current : 100 – 5000A  
 Secondary current : 5A  
 Highest voltage : 0.72kV  
 Rate frequency : 50/60Hz  
 Power frequency withstand voltage : 3kV  
 Rate load : 1.5 – 20VA

Application : Elzen tranformer for the moded current transformer ,shell with flame retardant plastic :installation can be fixed and backplane bus bar fixed installation

Oparrating temperature : -25°C--+55°C  
 Storage temperature :-35°C+70°C
